

# To Pin Or Not To Pin?

In this puzzle, half of the clues work normally.  
As for the rest:

(A) For some clues, you must add a letter to the answer before entry, in tribute to a well-known birthday-party game involving pins. This will always yield a new word, possibly abbreviated.

(B) Each of the other clues contains an extraneous word that must be removed before solving. This extraneous word is always the definition of one of the new words formed by adding a letter as in (A); taking these extra letters, in order by (B) clue, will yield another thing you can do at a birthday party, which requires no pins whatsoever.

## ACROSS

1. A Sumerian city with a vibe
4. Secy. that ultimately wears a sheet the right way
