

# Bold Choices by Ucaoimhu

This puzzle lets you explore your options at leisure. Specifically, each of the boldfaced clues has two possible answers, one of which must be entered in each grid (the alphabetically first answer to 20 Across goes in the first grid, and the placement of the others can be subsequently deduced). Nonbold clues yield one answer each, which is entered (normally) in both grids. All nonbold Down clues work normally, but in each nonbold Across clue the letter string the wordplay yields has an extraneous letter at (1) the start or (2) the end.

For each type-2 extraneous letter, use that letter and its numeric position in the letter string as coordinates, and circle (in both grids) the letter at those coordinates. Then in each grid, for every letter circled in that grid, shade in all the squares in that grid containing that letter. The circled letters (read column by column in each grid, one grid after the other) will spell out a three-word phrase appropriate to this party; combined with what the shaded-in squares depict, it will also suit the upcoming occasion for leisure that is spelled out by the type-1 extraneous letters.

## ACROSS

1. Domain-stealer's husband is loud (4)
4. Author Dinesen is stuffing tailless hake (4)
7. Movie about sci. prefix meaning "of fish" (5)
10. Oakland players misread a line giving Catwoman's first name (6)
