

House to House to House

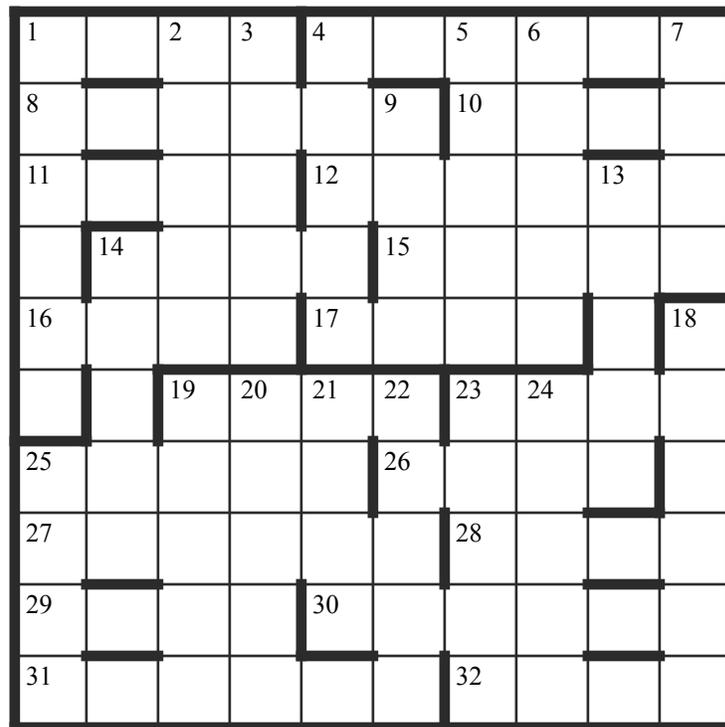

by Ucaimhu

Having both Friendsgiving and Thanksgiving is an opportunity to visit two houses; this year, however, we can visit three — sort of. Specifically, there is a house that, in between the others, is (I'm told) visible twice in abbreviated, changed, and repositioned form. Correspondingly, three alterations each must be performed on five Across answers before entry and on one word in each of six Down clues before solving: (1) **abbreviate** 60%, (2) **change** A to U, and (3) **reposition** (that is, anagram) into a monosyllabic word. For each n from 1 to 3, write the n th-from-last letters of the clues affected by change n in row n below the grid (in clue order). The result will show (1) the two places this house has been repositioned to, and (2 and 3) the two people shown as its owner.

Each of the five remaining Across answers must be entered with multiple letters in one unchecked square. These multi-letter sequences, in clue order, will give the name of one place we can “see” the house; apply changes (1), (2), and (3) (in order) to this name to get the name of the other. Then for each multi-letter sequence, if its letters are the m th through n th of the answer, note the m th through n th letters of the clue, find the boxes below the grid with those letters in the upper left corner, and next to the clue write down the letters you wrote in those boxes; these letters next to the clues (in clue order) will name the “house” showing us these distorted house views between Friendsgiving and Thanksgiving, and the person whose house they are allegedly based upon.
